marmorin
KITCHEN

Marmorin Kitchen is a three-generation family company, based in the European Union, specializing in manufacturing kitchen sinks from unique cast quartz stone - Magranit®. Our material, as well as products, are the outcome of decades of experience and in-depth understanding the context in which our products are set.

A kitchen is a vital part of every home. It is a place where a need for functional and reliable product solutions is combined with people's habits, their experience, and everyday life challenges. We understood from the very beginning that such important environment requires an exceptional product. As a result, our mission was and still is to recognize users' needs and to provide objects that can be used for many years many times a day. Products that will neither aesthetically displease nor functionally disappoint.

Throughout the years, Marmorin Kitchen has created more than 300 models of kitchen sinks. From a small single bowl solutions to large double bowl sinks with a drainer. Our portfolio is filled with products of a variety of designs reflecting all possible interior styles. Moreover, a vast number of color finishes and various installation methods guarantee that we have a solution for every person with any type of personality and a kitchen.

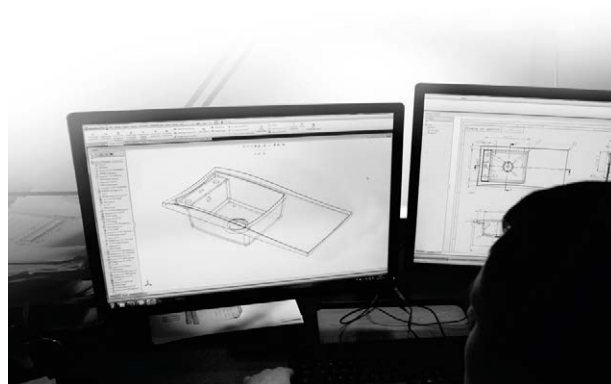

marmorin

DESIGNSTUDIO

Marmorin Design Studio is based first of all on people. It might seem obvious, but the people themselves are our secret - professionals in many branches: product designers, graphic designers, model builder, engineers, all focused on the same goal - supplying you with a product that should entirely satisfy your needs. The exceptionality of Marmorin Design Studio is a successful mix of services including designing, consulting, modeling and analyzing all completed under one roof, where the designing process can be conducted from an idea to ready product. None, even the best designing vision can exist without respecting technical requirements, manufacturing conditions and functionality of the final product.

We are aware that each product must ideally meet the context of its place and destination. That's why we adjust it concerning functionality, production technology, and particular project requirements. The artistic element in our harmonious team is completed technical and precise skills. We do not work in a vacuum. By keeping track of the newest trends and changes in needs and desires of people, we make sure that our new projects are meaningful and appreciated by our Customers.

MAGRANIT®

CAST QUARTZ STONE

MAGRANIT® is our unique material solution engineered especially for the production of casted kitchen sinks. The material is primarily made of pure and natural quartz which makes it very strong and durable. The quartz aggregate is bounded together with dedicated resin and additional refining compounds creating material dedicated to the kitchen environment. MAGRANIT® products have uniform void-free structure and are resistant to very high temperatures. Perfect surface finish ensures a high level of hygiene and makes it easy to clean. Chemical and physical characteristics of MAGRANIT® allow for casting products of various shapes and sizes. From small and compact solutions to large sinks. In addition, the material comes with a wide range of color options, from cold to warm tones.

FOORN

FOORN

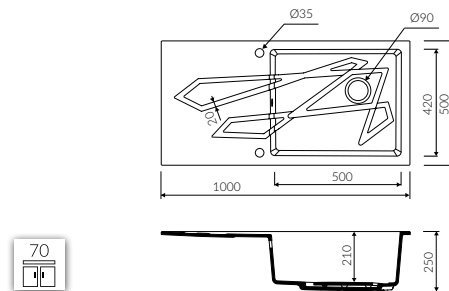

Foorn is an example of unconventional approach to kitchen design. Surface of the draining board and the sink inside are decorated with a bit fanciful irregular shapes. The decorative elements are in two options: with open or closed lines. The kitchen sink design softens the cold impression of the metal cupboards and countertops made of polished concrete with no harm to the elegance of the interior.

FOORN II 1000 1KO

Index: P_Z_036_11_1000

OPAL

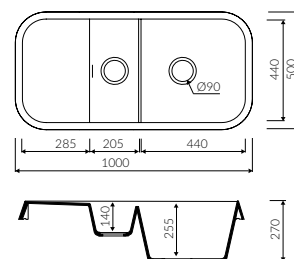

OPAL

Opal is all about functionality of softly flowing pure lines. Dedicated for simple and handy interiors, perfect for kitchen islands in spacious, light-coloured kitchens. The sink edge eight centimeters higher than the countertop surface was designed with due regard to ergonomic principles and care for user comfort.

MAGRANIT®

OPAL 1000 1,5KO
Index: P_Z_064_51_1000

AKO

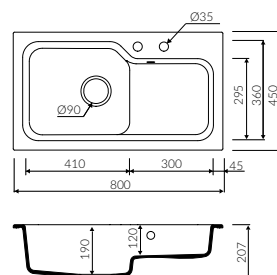

AKO

The Ako line is distinguished by unconventional, lowered bowl, that can be treated as one big or two smaller ones. Thanks to this feature the sinks can be adjusted to the current needs of the user. The second bowl can serve as draining board or extra space.

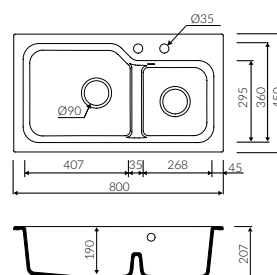

MAGRANIT®

AKO 800 1KO

Index: P_Z_001_50_0800

RUBID

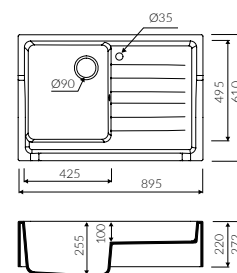

RUBID

Rubid is a proposal for those who love big retro kitchen sinks. Although made of modern materials the shape of the model resembles rich design from the past. Rubid is itself a decorative kitchen finishing. Big and comfortable draining board is finished with an extra protective wall. This countertop sink fits perfectly in warm and cosy interiors. Goes well with traditional kitchen styles and decorative elements.

MAGRANIT®

RUBID 895 1KO
Index: P_Z_074_11_0895

IVO

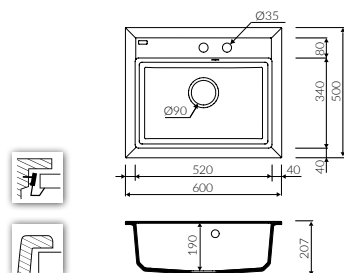

I VO

The kitchen sinks Ivo can face the countertop or can be fitted in traditional way. It guarantees optimal simplicity and clear shapes. Based on subtle lines, it combines usage comfort and transparent design. Big bowl and comfortable draining board maximize functionality of the washing-up place.

TESSA

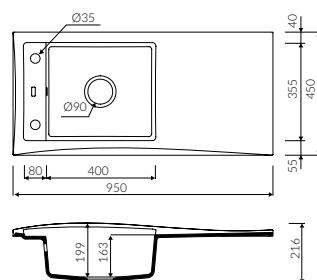

TESSA

Kitchen sink of very unconventional form. Next to the bowl is an interestingly profiled, functional draining board. The new cutting-edge form of the sink breaks up the ascetic style of interiors where dominate cool wand decent colours. An interesting accent of extraordinary sink form gives the kitchen a unique touch.

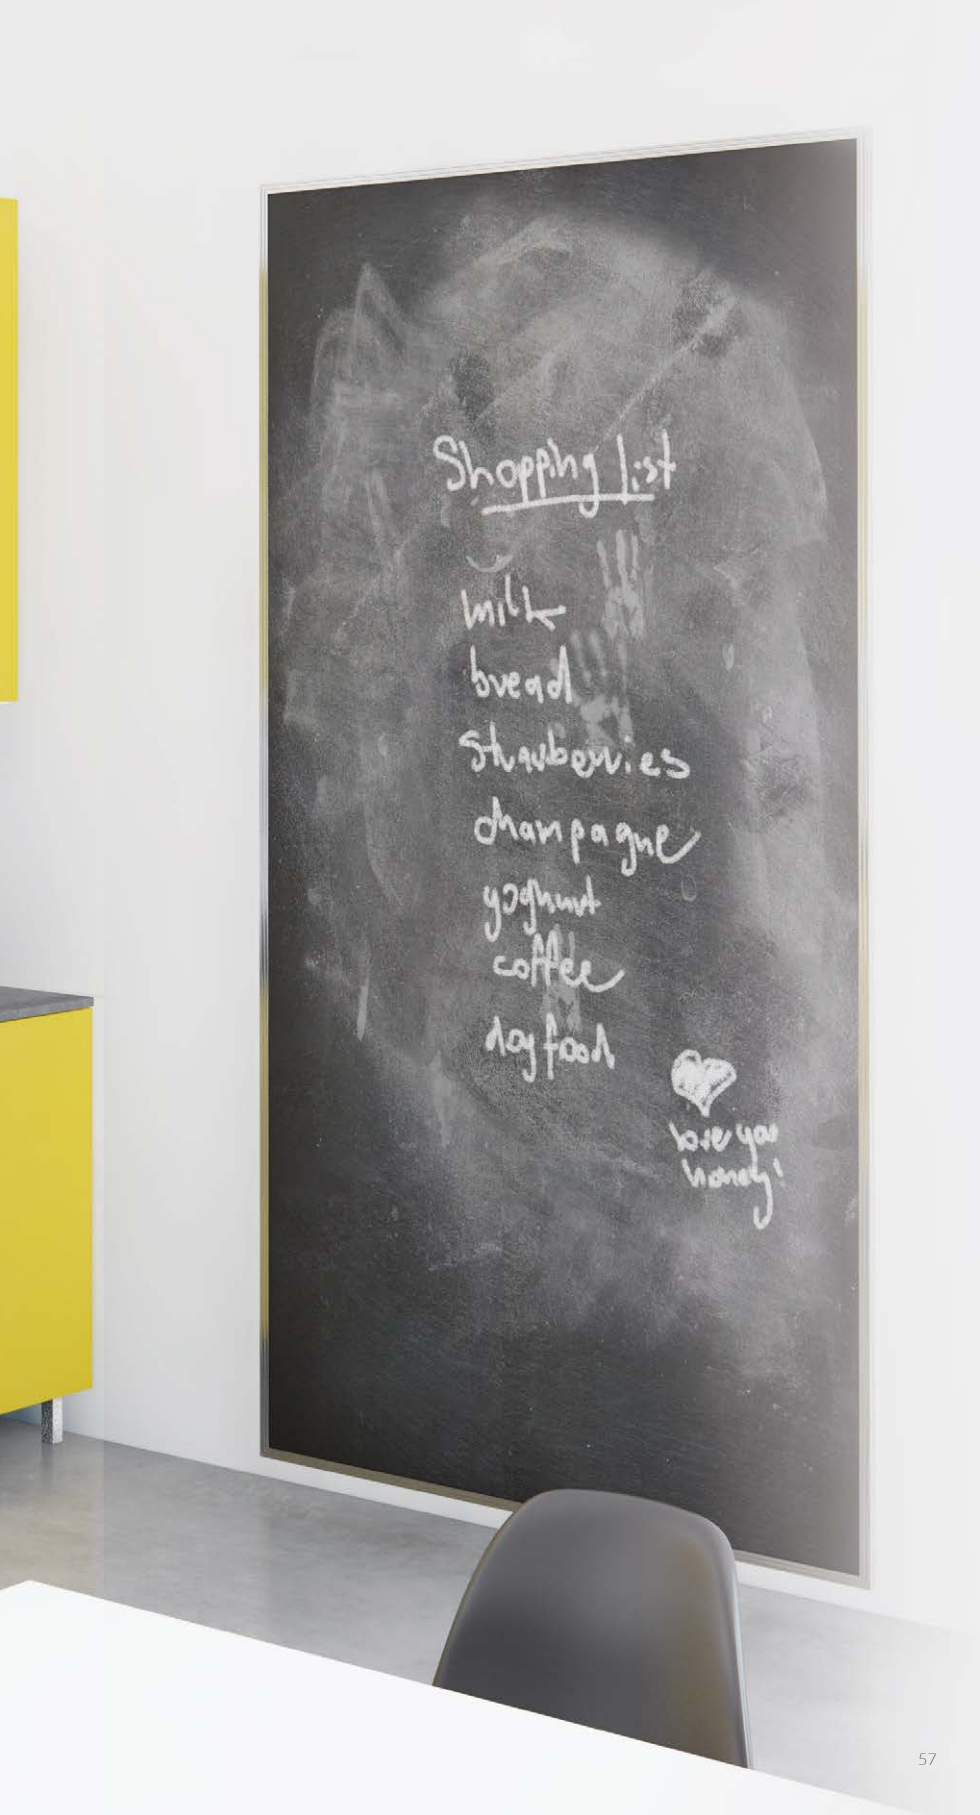

MAGRANIT®

TESSA 950 1KO
Index: P_Z_085_11_0950

EWIT

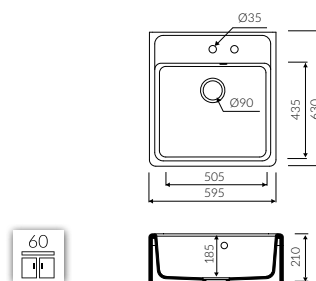

EWIT

The series of kitchen sinks Ewit offers harmonious proportions suitable for both small and bigger kitchens. Discrete design makes sure that it fits well in many interiors regardless of their style.

Index: P_Z_029_20_0895

OLWIN

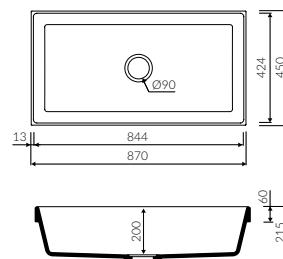

OLWIN

The family of Olwin sinks is distinguished by higher edge, going beyond the countertop. This practical model has been equipped with big, comfortable bowl able for bigger dishes. Olwin looks good in spacious kitchen of more professional, colder style. The model perfectly breaks simple, plain design with no harm to precision of the kitchen image.

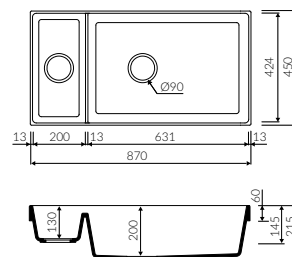

MAGRANIT®

OLWIN II 870 1K
Index: P_Z_063_10_0870

OLWIN I 870 1,5K
Index: P_Z_063_50_0870

BATEA

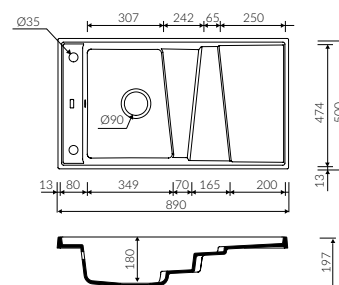

BATEA

The project was inspired by flows of water in the nature. The extraordinary arrangement of the bowl is an attempt to prolong this natural waterflow in the contemporary kitchen responding to user's needs. Unique lowered surface facilitates reaching the inside. Geometrical layers of efflux enable putting in the sink various elements at the same time. The model fits very well to modern interiors finished with cutting-edge details.

MAGRANIT®

BATEA 890 1KO
Index: P_Z_011_11_0890

VOGA II

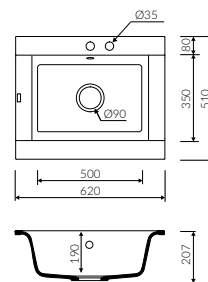

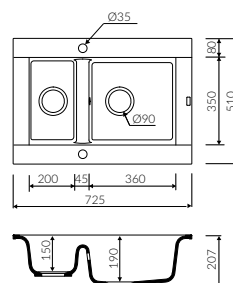

VOGA II

Proposal of charmingly pure form for modern kitchens. Soft rounding of one of the bowls breaks the simplicity of the sink and cares for an interesting form. Comfortable draining board with no additional decorations fits perfectly to the industrial severity of the countertop.

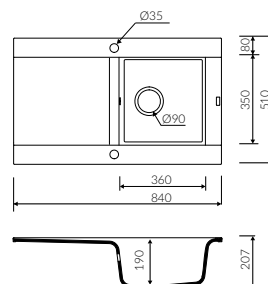

MAGRANIT®
